

What are Yeast Metabolites?

Yeast metabolites are unique products with multiple benefits created by proprietary anaerobic fermentation technology

The unique products of yeast metabolites are

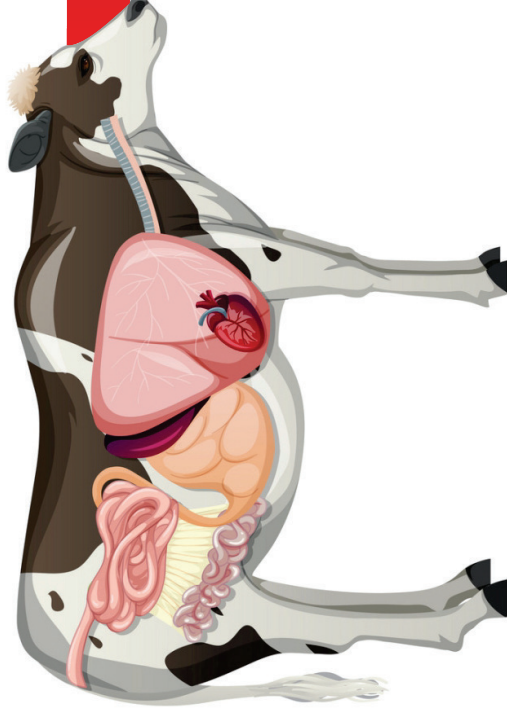

Introducing

**RUMICHARGE[™] -GOLD
LIQUID**

With the power of Yeast Metabolites

**FAST ACTING
FORMULA**

Composition :

Yeast Metabolites, Vitamins,
Minerals, Oligosaccharide &
Rumen microflora activity
enhancer

How does Yeast Metabolite help ?

- It nurtures rumen microbial population by significantly increasing the level of nutrients obtained from the ration
- The resulting flourishing microbial populations more fully convert feedstuffs to nutrients, thereby optimise rumen performance
- It increases the population of fiber-digesting bacteria
- It maintains higher ruminal pH & alters the ruminal starch digestive rate
- It decreases lactate accumulation & increases propionate production under high starch feeding conditions

Benefits of Rumicharge Gold

Improves Dry matter Intake.

Supports digestive tissue integrity

Promotes healthy microbial balance

Optimises animal health and well being

Enhances production efficiency

Improves milk yield

Pack Size
100 ml

Dosage:

Cattle / Buffalo/ Large Animals :- 15 ml twice a day
Sheep / Goat / Small Animals - 2.5 ml twice a day
